

Autodispatcher Demo Report

Synthetic advisory simulation | 08:25:00 - 08:40:01 | Asia/Qyzylorda

Quality Index: 92.1 / 100 (NORMAL)

Total projected delay: 0.0 min. Hard conflicts: 0. Selected recommendation: Protect passenger priority.

Train	Type	State	Delay (min)	Arrival
E101	express	moving	0.0	09:54:57
P102	passenger	stopped	0.0	10:11:11
F103	freight	moving	0.0	11:10:12
P104	passenger	moving	0.0	10:37:13
F105	freight	moving	0.0	11:35:50
E106	express	stopped	0.0	11:00:58
P107	passenger	stopped	0.0	11:44:29
F108	freight	moving	0.0	12:03:47
P109	passenger	stopped	0.0	12:01:11
F110	freight	scheduled	0.0	12:37:12
E111	express	moving	0.0	12:24:28
P112	passenger	scheduled	0.0	12:43:30
F113	freight	scheduled	0.0	13:33:59
P114	passenger	scheduled	0.0	13:05:27
F115	freight	scheduled	0.0	13:59:54
E116	express	scheduled	0.0	13:29:14

Quality breakdown

Schedule: score 100.0, weight 30%, contribution 30.0. Priority-weighted delay 0.0 min

Capacity: score 85.4, weight 20%, contribution 17.07. 6/16 services moving; target utilization 70%

Energy: score 75, weight 20%, contribution 15.0. Mean advisory energy saving 0.0% over full-power baseline

Conflict: score 100, weight 20%, contribution 20.0. 0 unresolved resource conflicts

Arrival: score 100.0, weight 10%, contribution 10.0. Mean projected arrival deviation 0.0 min

Incidents & replanning actions

I001: delay_10 at P104, active, duration 10 min

08:40:00 - Seed 42 scenario initialized; 15-minute warm-up recorded

08:40:01 - Injected delay_10 at P104

08:40:01 - Replanning finished: 3 verified alternatives, 2536 ms

08:40:01 - Replanning finished: 3 verified alternatives, 2377 ms

08:40:01 - Applied to simulator: Protect passenger priority; zero hard conflicts

Decision-support prototype. Fictional data only. Recommendations apply to the simulator and do not control railway infrastructure.
